Description: A new edition of the New York Times bestseller—now a three-part Nova special: a fascinating and thought-provoking journey through the mysteries of space, time, and matter. Now with a new preface (not in any other edition) that will review the enormous public reception of the relatively obscure string theory—made possible by this book and an increased...

Review: Brian Greene is one of the easiest of the serious physicist writers to follow. This book is long, but packed with info, and fully readable by most anybody (no math to speak of). He is exceptionally good at explaining and illustrating the concept of many-dimensions, and even illustrates what (if you use your imagination) they may look like. As with...
